To Whom It May Concern:

Kittipong Techapanichgul worked for me at the PASA Project at the University of Pittsburgh for the past 14 months as an assistant programmer and database designer. I am writing this letter of recommendation to tell you what an asset Kittipong has been to our project.

Kittipong has proven himself to be a very fast learner on our project. When he first started working on our project we asked him to learn quite a few new data structures as well as take over administration of our website. He was quick to learn any new concept we put to him with an enthusiasm matched only by his desire to learn more.

Kittipong is always willing to help out in a pinch. There were many times that he moved back and forth between different projects seamlessly. He could be writing database queries one day and writing algorithms for our latest program the next. He never once hesitated to help out where needed and was able to effortlessly flow between tasks.

If we had a full time position open here I would hire Kittipong in a second. He is one of the most dedicated and gracious employees we've had on the project. You will be hard pressed to find someone who would be more dedicated to your company than Kittipong. If you would like more information I would be happy to provide it. Please call (412) 648-7306 and ask for me.

Sincerely,

Brian Beggs  
System Programmer IV, PASA Project
